

FRIENDSHIP

There are Friends who's hearts exchange Feelings, Joy, Sadness
and Friendship,

In easy ways, not always loud or in high celebration, In just
Being who they Are.

Such Expression and Unity of each other's firmament, as it were,
Celebrates Life, as it should be.

Never forget those with whom you harmonized and take the Joy
onward into more Scenes and Situations.

Love is Never Forgotten, Just added into an Eternal Bank
Account of Good Treasures.

JOY, PEACE, & GOOD VIBRATIONS!

FRIENDSHIP by Philip E. Friberg, Circa 1992, copyrighted. Friendship is so easy to give and a treasure to receive. In Grade School, Friends were the most important part of it alland they still are. In Quantum Physics particles are both matter and vibrations are waves of energy. Friendship is among the highest of all energy types.
